

COMPUTER INFORMATION SYSTEMS

Objectives for the HLGU CIS Major

Statement of Mission and Purpose:

The mission of Hannibal-LaGrange University is to provide an excellent education in both liberal arts and professional disciplines in a distinctively Christian environment that integrates Christian faith and learning in preparing graduates for personal and career effectiveness.

The mission of the Computer Information Systems department is to provide an excellent professional education in the field of computers and technology in a distinctively Christian environment that integrates Christian faith and learning in preparing graduates for personal and career effectiveness.

Broad Program Goals:

It is the goal of the Computer Information Systems Department to help a student develop personal values and professional skills preparing them for further study in the fields of computers and technology and making them marketable in a computer or technology related field. This will be accomplished through classroom instruction, professional modeling, individual projects and an extensive program of internships providing real world hands-on experience based on a broad set of foundational skills from the CIS field including: Hardware, Software, Programming, Database, Networking, and Web Design.

Objectives for the CIS Graduate:

1. Install, use and support hardware and software in accordance to IT professional standards.
2. Create original meaningful programs in accordance to IT professional standards.
3. Design and support databases applications in accordance to IT professional standards.
4. Design, implement, and administrate networks in accordance to IT professional standards.
5. Design, create and support websites in accordance to IT professional standards.
6. Acquire professional IT experience through internships.
7. Demonstrate commitment to ethical professional conduct.

**Our purpose is to help you discover
God's purpose for your life.**
