

Computer Sciences

Objectives for the HLGU CS Major

Statement of Mission and Purpose:

The mission of Hannibal-LaGrange University is to provide an excellent education in both liberal arts and professional disciplines in a distinctively Christian environment that integrates Christian faith and learning in preparing graduates for personal and career effectiveness.

The purpose of the Computer Sciences (CS) major is to provide an excellent education in the field of computers and technology in a distinctively Christian environment, thus preparing students for both personal and career effectiveness.

Broad Program Goals:

It is the goal of the Computer Sciences Department to help a student develop personal values and professional skills preparing them for further study in the fields of computers and technology and making them marketable in a computer or technology related field. This will be accomplished through classroom instruction, professional modeling, individual projects, and internships providing real world hands-on experience based on a broad set of foundational skills from the Computer Sciences.

Objectives for the Computer Sciences Graduate:

The Computer Sciences Department majors will:

1. Acquire professional computer sciences experience and communication skills through internships and/or projects.
2. Demonstrate knowledge of best ethical practices and models making application to case studies.
3. Demonstrate knowledge of best practices for solving problems common to the computer sciences.

**Our purpose is to help you discover
God's purpose for your life.**
